

Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently amended): A dental supply cart comprising a base unit, a top member, rotating means interposed between said base unit and said top member, at least one movable slide member interposed between said base unit and said top member, said rotating means and said at least one movable slide member permitting said top member to be rotated and to be moved forward and rearward relative with respect to said base unit, and a supply cabinet attached to said top member.

2. (Original): The dental supply cart as defined in claim 1 wherein said rotating means comprises a first plate having a bearing race therein, a second plate having a bearing race therein, and a plurality of bearings captured between said bearing race in said first plate and said bearing race in said second plate.

3. (Currently amended): The dental supply cart as defined in claim 2 wherein said first plate is operably attached to said base unit and said second plate is operably attached to said top member.

4. (Canceled).

5. (Currently amended): The dental supply cart as defined in claim [[4]] 1 further including a shelf member interposed between said at least one movable slide member and said top member permitting said shelf member and said top member to be moved forward and rearward and to be rotated with respect to said base member.

6. (Original): A dental supply cart comprising a base unit, a shelf member, at least one movable slide member interposed between said base unit and said shelf member permitting said shelf member to be moved forward and rearward with respect to said base unit, a top member, rotating means interposed between said shelf member and said top member permitting said top member to be rotated relative to said shelf member, and a supply cabinet attached to said top member.

7. (Original): The dental supply cart as defined in claim 6 wherein said rotating means comprises a first plate having a bearing race therein, a second plate having a bearing race therein, and a plurality of bearings captured between said bearing race in said first plate and said bearing race in said second plate.

8. (Currently amended): The dental supply cart as defined in claim 7 wherein said first plate is operably attached to said shelf member and said second plate is operably attached to said top member.
